

S550 (H or V) INLESS STEEL

Return Air Grille

The series 550 return air grille is styled to match the 150 and 250 supply grilles. The face bars are non-adjustable and available in either a horizontal or vertical position, factory set at either 0 or 45 degrees, spaced on .750" centers.

The same hollow air-foil bars used on the supply grilles are used on the return air grilles.

Available with horizontal face bars, 550H, or vertical face bars, 550V. Constructed from type 304 stainless, satin finish standard. Type 316 stainless steel is also available at an additional cost.

Specify series S-44 opposed blade damper attached to the 550 series to make return registers. The S-44 OBD assures even distribution of air across the grille face as well as positive volume control.

SEE OPTIONS PAGES:
